Expansion formula for a generalized Meijer function in series of Jacobi polynomials. **50** #13654

An extension on generalized Meijer functions of two variables with applications. (Turkish summary) **52** #3631

On generalized Meijer's and associated generalized Legendre's functions. **46** #3853

On generalizations of some results and their applications. **51** #954

On a generalized Fox's H-function. **48** #8881

On generalized functions involving classical polynomials. **48** #8883

A new formula on generalized functions. **51** #955

A note on generalization of Edelstein's addition theorem on G-function. (Turkish summary) **49** #3240

A theorem on generalized Meijer function of two variables. (Turkish summary) **50** #5051

A summation formula on Kampé de Fériet function. **49** #3235

Integrals involving generalised Meijer functions of two variables and generalized Legendre associated functions. **54** #3055

A solution of the boundary value problem in heat conduction. **49** #658

A recurrence formula on generalized Meijer function of two variables. **50** #10357

Several properties of generalized Fox's H-functions and their applications. **47** #5315

On some applications related to Fox's H-functions of two variables. **50** #7612

Some multiplication theorems involving Fox's H-functions of two variables. **51** #3571

On applications of inversion theorems of Laplace and Mellin transforms associated with Fox's H-functions of two variables. **51** #3572

Application of Hermite polynomials for certain properties of Fox's H-function of two variables. **52** #3632

Fourier expansion formulas for generalized Meijer functions. (Hindi. English summary) **48** #8884

Some results connected with extended Fox's H-functions and their applications. (Hindi. English summary) **51** #956

On a generalization of MacRobert's multiplication formula for the E-function series. **52** #8523

Applications of Hermite polynomials for certain properties of Fox's H-function of two variables. **55** #733

On a unified result involving generalized function of two variables. **50** #13655

A result on Fox's H-function of two variables. **51** #5992

An addition theorem on Fox's H-function of two variables. **52** #11141

On generalised functions of two variables connected with orthogonal polynomials. (Hindi. English summary) **51** #957

On applications of H-functions. **54** #7897

A unified presentation of an integral equation. (Turkish summary) **58** #11548

An extension of Rice's result on an integral equation. **52** #11142

An expansion theorem for the H-function. **54** #7898

Some results on generating functions. **54** #10705

A result on an extension of Fox's H-function. **54** #7899

Sharma, Bhagirath Lal An integral involving G-function. **47** #8926

Some expansion formulae for Bessel and G-functions. **48** #2445

Sum of a series involving Laguerre polynomials and generalized functions of two variables. (Romanian summary) **46** #5692

(*with* Abiodun, R. F. A.) Some finite series for G-function. **48** #2446

An expansion formula for G-function. (Romanian summary) **48** #4364

An expansion formula for G-function. **51** #5993

An integral involving products of G-function and generalised function of two variables. **48** #6494

Some expansion theorems for generalized function of two variables and Jacobi polynomials. **46** #2110

(*with* Abiodun, R. F. A.) New generating functions for the G-function. **48** #11607
